

Introduction of PVS Vana Sanayi ve Ticaret Ltd.Şti.

PVS VANA SANAYİ VE TİCARET LİMİTED ŞİRKETİ was established on 14/04/2022 with the target to offer wide portfolio of industrial valves and accessories, including consulting, development and supply of special valves for concrete cases.

PVS VANA is a direct representative of I.B.C. Praha spol s.r.o, Czech Republic, which has been a manufacturer and supplier of industrial valves and accessories in the field of Oil & Gas, Conventional and Nuclear power for more than 28 years.

We would like briefly introduce our partner from the Czech Republic and thereby offer you the services of our company, which is ready to provide you with full support and cooperation in solving your needs or choosing the optimal solution for the deployment of industrial valves in your projects

PVS VANA mainly offer its partner's products - from the Czech Republic, but also ready to complete full project as a package with proven sub-suppliers including warranty 24 months. In production line of the company is High Pressure and Low pressure ball valves, shut-off and non-return valves, butterfly valves, strainers, and also special valves which can be developed and manufactured according to the parameters, customer's and applications needs. Valves can be manufactured and supplied according to EN, DIN, API, ANSI, GOST standards.

Our aims to participate in complete deliveries based on tenders and competitions for the energy, chemical, petrochemical and gas industries, as well as a small deliveries of the valves from our stock for the industrial and water supply applications.

From the production program, we would highlight mainly supplying of the gate valves, different type of ball valves: floating or trunnion ball type and also new developed product: metal sealed ball valve – type TOP ENTRY. Products which offered and supplied by I.B.C. Praha spol ensure trouble-free operation and high quality, thanks to own design and production facilities.

Main customers of the company is petrochemical, gas and energy companies from CIS territories and EU countries. Significant deliveries were made to geothermal power plants in Iceland. An overview of the most important references is given on the web pages.

The entire production range is certified for deliveries to the Russian Federation, and product certification according to Directive 97/23/EC has been completed since 2004. ISO 9001, ISO 14001, ISO 3834-2, ISO 45001 certification is a matter of course.

Company now on is concentrated on participation for AKKUYU NPP in Turkey. For these purposes, to be able to meet the requirements of nuclear safety new developments and improvements of the valves were adjusted.

The basic principles of the philosophy of the company I.B.C. Praha spol has always been to provide high quality for reasonable prices. This intention is also the aim of our company PSV Vana and we strongly believe that this target will be achieved here in Turkey as well.

The management of the company and the staff of PSV Vana and I.B.C. Praha spol.
